 Suite	 Exchange
	 Nextcloud

SyncSign Display can be seamlessly integrated into your existing calendar system (Microsoft Office 365, Google Calendar / G-Suite, or MS Exchange), and synchronizes the room schedule to be displayed on the conference room display.

- Syncs with existing calendars
- Energy-efficient & maintenance-free
- Long Battery Autonomy Life: 1.5~2 years (Depending on usage)
- Easy-to-install. No need of complex electricity deployment. Just like a sticky note
- Always connected

SyncSign also offers the open API / SDK document.

- With open Restful Web API, you may push any content that you created to the display.
- With Hub SDK, developers can easily write Python code and deploy the application to the hub.
